Tip:

Staining Fiber/Cement Board Siding (Hardie Board®, Certainteed®, LP SmartSide®, Celect®, ect....)

More and more we are getting questions about putting Structures Wood Care® over Fiber Cement Board. Especially from the states that have Carpenter Bees. We would like everyone to know that you CAN put our **Nature One® 100% Acrylic** over this material with complete confidence.

Carpenter Bee

To apply, just follow the Applications Guides at www.structureswoodcare.com . Once there, roll over the 'Products' tab at the top of the page, then click the 'NatureOne®' tab. Go to the very bottom of that page. Click on the 'Exterior Siding' tab under Application Guides headline. Print them and follow the directions on those pages. For maximum protection, coat every side of the boards with at least one coat, preferably two, before attaching siding onto your home. Once attached, put the final coat(s) on.
